

Neches Wild and Scenic River Initiative

TRIBUTARIES

Designating the Neches as a Wild and Scenic River would have no affect on tributaries unless they are also designated as segments within the Wild and Scenic River. The proposed Neches River study area extends from the dam forming Lake Palestine to the flood pool of B.A. Steinhagen Reservoir.

The confluence of the Angelina and Neches Rivers is below the proposed Neches River study area, so the Angelina would not be included in the study. Nor would the Angelina be affected by the designation.
