

Smarter Water for North Texas

Texas Conservation Alliance TCAatexas.org

Sources of Information

The water supply and demand numbers used by Texas Conservation Alliance to analyze North Texas' future water needs are generated by the Region C Water Planning Group in its regional plan and incorporated in the State Water Plan by the Texas Water Development Board.

The Executive Summaries of the State Water Plan and the Region C Plan are on the Texas Conservation Alliance website, along with other background information:

TCAatexas.org/hot.php

Information about specific reservoirs comes from engineering studies and the agencies which operate the reservoirs. Information such as populations, costs of pipelines, and kind of plants and animals in a specific area come from a variety of governmental and academic sources.
