

# SMARTER WATER FOR NORTH TEXAS

## Alliance Offers Programs in the DFW Area

Texas Conservation Alliance is offering programs in the DFW area with a message local folks have never heard: there is enough water in existing lakes to meet the DFW-area's future demands! The big decision is to tap those existing water supplies rather than build new reservoirs.

The Alliance invites North Texans to explore low-cost, low-impact water supply options with an interesting upbeat program: ***Smarter Water for North Texas!***

Carol Spruiell

Carol Spruiell, Milton Hickman, or David Marquis will share the Alliance's long experience on Texas water issues with your organization. To schedule a program, contact one of these instructors:
